## ADDITIONAL ACCESSORIES

<b>GAMS</b>	GNSS Azimuth Measurement System (GAMS) adds an additional GNSS antenna, making it faster to initialize the navigation system and eliminate any special driving maneuvers for initialization.
<b>DMI</b>	The DMI (Distance Measuring Indicator) is a mechanical wheel odometer that can improve the measurement accuracy in challenging GNSS conditions, or areas with heavy stop and go traffic.
<b>Add on warranties</b>	Single and multi-year warranty options available, covering hardware, software and support.

## SOFTWARE

<b>Trimble Mobile Imaging</b>	Trimble Mobile Imaging field software lets you control your mobile mapping system in the field, from a web browser, providing real-time access to collection data, live camera feeds, LiDAR and trajectory information.
<b>Trimble Business Center</b>	With the Trimble Business Center (TBC) mobile mapping module, you can conduct trajectory processing, point cloud registration and colorization as well as being able to classify and export features—all in a single software.
<b>Trimble MX</b>	Trimble MX Publisher simplifies the sharing of mobile mapping results with project stakeholders. Organize, extract and collaborate on mobile mapping data and utilize plug-ins for streamlined access to mobile mapping data in many popular GIS and CAD environments.
